

# **Temporary access to 3rd party systems with Azure Identity Governance**

17.11.2021 – KPMG, Oslo

# The next 20 minutes

- An introduction to Azure Identity Governance.
- How we «lifehacked» it to use it for temporary access in 3rd party systems.
- What to do if you want to know more.

# Bastiaan Wassenaar

Consultant

Winc IT AS

- Dutch guy in Norway (Voss) since 2013
- Currently @Vipps (Architecture and IAM)
- Focussing on Azure core services and software architecture.

MVPdagen – 5 års jubileum  
Fra oss til deg

vipps

# Azure Identity Governance

- «Add-on» for Azure Active Directory (AAD)
- A way to **manage** and **govern** AAD resources
- Approval and review process
- Guest user management (!)
- Self-service Portal for users: [MyAccess.Microsoft.com](https://myaccess.microsoft.com)

# Azure Identity Governance

- Goes hand in hand with Privileged Identity Management (PIM)
- **No** Azure CLI
- Only Graph API (for now)  
*(including Powershell Modules)*
- AAD P2 License

# Reasons we started using AIG in Vipps

Introducing: Project Skohorn #pålag

1. Take out the servicedesk ticket for access.  
Make it self service. #nullstress
2. Fix this issue for the governance people.  
*Who owns an AAD group and when was it last reviewed?*

**Important rule:** #smarttenkt

*A 3rd party system must integrate with Azure Active Directory*

# Azure AD Groups

- Access
- Licenses
- Applications
- E-Mail Distribution lists
- Teams channels
- ...

# Introducing the "Access Package"

## Demo

# Want to know more?

- [Microsoft Docs](#)
- [Microsoft Learn](#)

## Try it out!

# Thanks / Takk / Bedankt
